DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 01 August 2005, in which claims 1, 4, and 16-18 were amended and claims 20-22 were added, has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear if the handle is actually "removed" or if it is "removable" (line 10), and the use of the term "removed" in the claim is confusing. The examiner recommends use of the term "removable" to more clearly describe this feature of the claimed invention.

Allowable Subject Matter

4. Claims 1-17 and 19-22 are allowed.

Art Unit: 3616

5. Claim 18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

6. The following is a statement of reasons for the indication of allowable subject matter:

The allowable subject matter of claims 1 and 16-18 is the configuration of the temporary and fixedly attached connectors with respect to the headliner, inflatable protection device, grab handle, and vehicle body, in combination with other features of the claims.

The allowable subject matter of claims 4 and 19 is the specific anchor, fastener, receiving, and latch portions of the grab handle, in combination with the headliner, inflatable protection device, connectors, and other features of the claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nishikaji and Kalandek et al. each disclose a headliner, curtain airbag, fill tube, and clamp assembly.

Ohno discloses a headliner, curtain airbag, and grab handle assembly.

LeVey et al. disclose a headliner, curtain airbag, and releasably attached connector assembly.

Art Unit: 3616
